

RAISED PANEL BITS

12PORGR 38 illustrated

These cutters are carefully designed to give a selection of various forms for door centre panels. The shapes are all arranged for easy sanding and finishing. All cutters will give 26mm (1") of form width by 10mm (13/32") depth plus 13mm (1/2") length of tongue.

For vertical mounting in router tables refer to page 16.

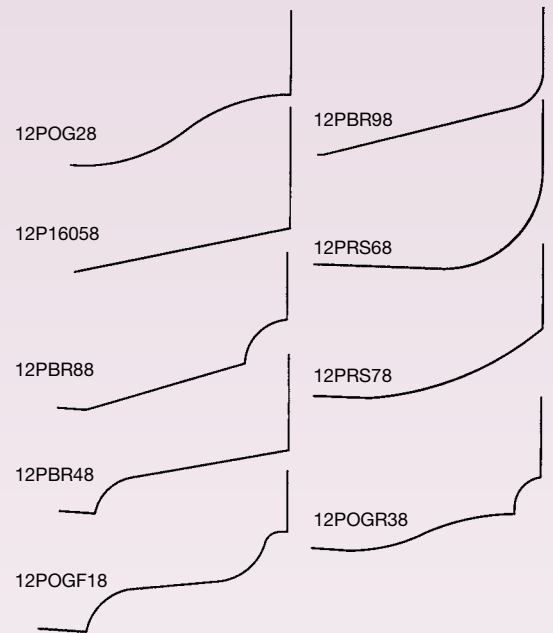

12,000 RPM maximum speed.

12FJ79	9416206150431
12FJ80	9416206150448

Matching male and female cutters from door style and spreaders. The cutters are arranged to work in conjunction with raised panel bits. Various forms are sized to joint material from 17mm to 20mm thick. B28 bearing fitted.

The best method is to set up 2 router tables 1 for the side and 1 for the top of frame this will allow the operator to make easier adjustment to each cutter.

Caution make the tongue and groove an easy slide fit.

CUPBOARD DOOR LIP BITS

Prod No.	Cutter Diam.	Cutting Length	APN
1/2" (12.7mm) Diameter x 1 5/8" (40mm) Long Shank			
12CDR88	52mm 2 1/16"	33mm 1 5/16"	9416206150455

This one piece cutter has a balanced profile and with the tapered rebate simplifies fitting the cupboard door.
